**Leverage Ratio-Disclosure Template**

**Date: As of December 31, 2015**

**Explanation when there are changes in Leverage Ratio (Table 4)**

1. This Table should be provided for each reporting period i.e. when there are changes in the Leverage Ratio exceeding 15
2. Material periodic changes in the leverage ratio: Banks are required to explain the key drivers of material changes in their Basel III leverage ratio observed from the end of the previous reporting period to the end of the current reporting period (whether these changes stem from changes in the numerator and/or from changes in the denominator).
3. The Basel III leverage ratio is defined as the capital measure (the numerator) divided by the exposure measure (the denominator), with this ratio expressed as a percentage:

Leverage ratio = Capital measure/Exposure measure

4. An analysis will need to be carried out both for the numerator (Tier-1 Capital) and exposure measure (denominator).

Date: As of December 31, 2015

A reconciliation requirements that details sources of material differences between the bank's total balance sheet assets in their financial statements and on-balance sheet exposures in the table 2.
